PRATHMESH HULAVALE

RPA Developer | UiPath Developer | Automation Developer | AI Automation Developer | Intelligent Automation Specialist

Thane, Maharashtra, India | +91 9921264661 | prathameshhulavale34@gmail.com | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Results-driven RPA Developer / UiPath Developer / Automation Developer / AI Automation Developer with 3+ years of experience designing, developing, and deploying scalable enterprise Robotic Process Automation (RPA) and Intelligent Automation solutions using UiPath, REFramework, MySQL, and SQL. Delivered 11+ automation solutions/bots in production, processing approximately 3600+ transactions per month and reducing manual effort by an average of 53.33% across projects. Proven expertise across the full automation lifecycle — process assessment, solution design (PDD/SDD), bot development, testing, deployment, Orchestrator administration, and production support. Hands-on experience with UiPath Studio, Orchestrator, Assistant, Document Understanding, AI Center, Agent Builder, and Maestro, integrating Generative AI, Agentic AI, LLM-powered workflows, and Intelligent Document Processing (IDP)/OCR to build next-generation intelligent automation. Certified UiPath Professional Automation Developer with a strong track record of improving process accuracy, reducing manual workload, and accelerating business operations across legal, logistics, and financial services domains. Seeking an Automation Developer / AI Automation Developer / RPA Developer role to deliver high-quality, efficient automation solutions that drive measurable business impact.

CORE SKILLS

- RPA Development | UiPath Studio | UiPath Orchestrator | UiPath Assistant | UiPath Apps
- REFramework (Robotic Enterprise Framework) | Attended & Unattended Automation | Queue Management
- UiPath Document Understanding | Intelligent Document Processing (IDP) | OCR | AI Center
- Agentic Automation | UiPath Agent Builder | UiPath Maestro | Generative AI | Agentic AI | LLM-Powered Workflows
- API Integration & Automation | Database Automation (MySQL/SQL) | Excel Automation | PDF Automation
- Email Automation | SAP Automation | Web Automation | Data Extraction & Data Validation
- Exception Handling | Error Handling | Logging & Monitoring | Bot Performance Optimization | Troubleshooting & Debugging
- Process Design Document (PDD) | Solution Design Document (SDD) | Business Process Automation | Workflow Optimization
- Version Control (GitHub) | Code Reviews | Production Support
- Orchestrator Administration | Asset Configuration | Bot Scheduling | Automation Performance Reporting
- Stakeholder Management | Cross-Functional Collaboration | Onshore/Offshore Delivery | Knowledge Transfer & Training
- Python (basic scripting) | JSON/XML

- Currently upskilling in AI FDE (AI Forward Deployed Engineering) concepts, focusing on AI application development, solution integration, and practical AI-driven automation.

CERTIFICATIONS

- UiPath Certified Professional Automation Developer (UiADP/UiARD) – Professional Certification – Digital Credential
- UiPath Certified Professional Agentic Automation Associate Certification – Digital Credential
- UiPath Certified Professional Specialized AI Associate Certification – Digital Credential

PROFESSIONAL EXPERIENCE

RPA Developer (UiPath) – Legal Analyst

CMA CGM GBSI – Legal Department *Nov 2025 – Present*

CMA CGM Global CDR Invoicing Process (RPA / UiPath)

- Collaborated with maritime lawyers to support Air and Ocean claim processes, ensuring accurate documentation, data validation, and regulatory compliance.
- Developed UiPath RPA automations for the Container Damage Recovery (CDR) process, including container number extraction and validation, damage location identification, and payer determination logic.
- Automated input of damage prices and dimensions, CMS record updates, case comment management, and invoice creation and distribution to stakeholders.
- Improved process accuracy to 90%, reduced manual workload by approximately 50%, and cut end-to-end processing time from 8 minutes to 4 minutes per transaction in maritime and shipping automation workflows. **CEVA Claims Dispatch Allocation Bot | UiPath RPA**
- Built an end-to-end UiPath RPA automation to streamline claims processing and allocation from the Case Management System (CMS), handling approximately 30+ claims per day.
- Implemented robust exception handling, retry mechanisms, and logging for reliable, resilient bot performance.
- Automated data extraction and system integration to improve data accuracy and workflow efficiency.
- Leveraged Generative AI (GenAI) for intelligent unstructured data extraction from documents.
- Developed rule-based allocation logic and automated notifications, reducing manual intervention by 100% and cutting average claim allocation time from 10 minutes to 1.5 minutes.
- Created automation performance reports, providing real-time visibility into 30+ claims processed per day and improving stakeholder reporting turnaround by 85%.

RPA Developer (UiPath)

Anza Solutions LLP *Oct 2023 – Nov 2025*

File Opening Process Automation | UiPath, MySQL

- Developed an end-to-end UiPath RPA automation solution for processing Money on Account (MOA) received via email, extracting key details and validating them against case records in CMS.
- Automated client, mortgage, and transaction data extraction and updates within the Case Management System (CMS), improving data accuracy to 95% and processing approximately 15+ case files per day.
- Automated instruction form downloads, data population, validation, file activation, progress tracking, and client warning card updates.
- Generated and distributed acknowledgment payment advice PDFs and conducted automated compliance checks in CMS and First AML, reducing manual document handling time by 100%.
- Automated SDLT calculation, report generation, and email notifications to Fee Earners and Operations teams, saving approximately 52 hours per week while maintaining full audit trails and document integrity. **SDLT Submission Process Automation | UiPath, MySQL**
- Designed and developed an end-to-end UiPath RPA automation for SDLT submission, processing approximately 20+ case references per day with automated attachment handling and queue management.
- Automated data extraction from CMS, structured data storage in Excel, and SDLT calculation logic for leasehold cases.
- Automated SDLT submission on the SDLT portal, including data entry, validation, and UTRN number extraction and updates in CMS.
- Managed database updates (insert/update), applied business rule exceptions, and generated a final BOT report, reducing manual reconciliation effort by approximately 53.33%.
- Automated distribution of SDLT payment forms and completion statements to onshore teams, cutting turnaround time by 53.33% and ensuring 100% compliance and process efficiency.

Agentic Automation Intelligent Invoice Processing and Discrepancy Investigation (Practice Project) (Maestro Flow- Agentic Automation)

Designed and developed an end-to-end invoice automation solution using UiPath Maestro Flow. The solution monitors incoming Gmail invoices, extracts invoice data using an AI agent, researches vendor details against indexed contracts, and routes discrepancies to an investigation agent for further analysis. This automation reduces manual processing, improves invoice validation accuracy, and accelerates exception resolution.

Technologies: UiPath Maestro Flow, UiPath AI Agents, Gmail Integration Service, Vendor Contract Index, Data Fabric.

EDUCATION

BSc (Information Technology) – University of Mumbai March 2022
